**Note:**

1. Core drill a hole which is 22.5mm wide and 120mm deep.
2. Chisel out the back of the hole to a wedge-shaped profile as shown, using a small jack hammer drill.
3. Tape up around the edge of the hole with duct tape to minimise mess.
4. Make a firm stiff mix of 2-part vertical application epoxy (enough for two holes at a time). You may wish to add a little fine sand to the mix.
5. Coat the inside of the hole and the back of the anchor; use more than you need.
6. Push the anchor in and turn to seat correctly. Reuse the excess mixture which oozes from the hole to start the next anchor.
7. Clean up and allow one week before stressing the anchor.

# Anti Wave Swimming Lane

Open Drawing

## General Sketch

### Step 1

Install Chemset Anchors correctly in the Pool Wall and wait one week before stressing them, hitch the Overflow Lane Anchor to the Chemset Anchor when you want to install the Lanes.

### Step 2

Open the Lane package, take the Super Tensioner's side and move all Discs and Floats to this side tightly.

### Step 3

Cut the Stainless Steel Cable as above drawing, then uninstall the Long Clamp.

### Step 4

Fix the S Hook to the Stainless Steel Cable as above drawing, then use the Washers and Nuts to screw them, then cut the extra Cable. Note: do not forget the Washer attached the last Discs.

### Step 5

Hitch the S Hooks to the Overflow Lane Anchor, then take the Lane to the another side of the pool.

### Step 6

Loose the long bolt of Super Tensioner, hitch the S Hooks to the another said of the pool, then close the long bolt, so finished all the Lane's assembly.
