# “AQUALUXE” LED LIGHT

# “AQUALUXE” LED LIGHT

- The AQUALUXE led lamp is simple and based on revolutionary construction with patent, that can allow the use of high power led into a body entirely in poly carbonate.
- The high precision of injection molds makes the structure completely sealed and impervious to oxidation.
- Able to generate a high brightness with very little consumption.
- Operation with standard transformers 12V AC allows easy replacement in existing systems.
- The color changing version is controlled either through on-of'f or by remote control.
- IP 68 protection rate.
