

SAUNA & STEAM ROOMS 16/05

EPS PANEL CUSTOMIZED STEAM ROOM

These structures are created with flame-retardant EPS with a density of 35/kg m3 and have a thickness of 9cm. All panels are smoothed with an eco-compatible cementitious finishing compound and are reinforced with a fiberglass mesh. The structure is ready to be waterproofed and covered with ceramic, marble or other wall covering. These steam room interiors include a single level bench with a backrest for comfort. Ergonomically designed, the bench and back rest are finished with a glass mosaic tile (both wall and floor) to provide a beautiful interior to a customised steam room.

✓ Technical features
