ECO NEXT *100% recyclable artificial grass*

It is a new PE support designed for the future with respect for the environment, as it is recyclable. cost-effective during field dismantling, as reusing it avoids disposal costs. Thanks to its structure, it allows for complete drainage across the entire surface, not just through the holes like the traditional old support.

PROPERTIES

- Synthetic coat's total recyclability
- Very high vertical draining capacity
- Coat's temperature reduction
- Less water requirement
- Doesn't freeze and doesn't get stiff
- Due to the absence of the holes, the turf is more durable
- CSI Recyclable Plastic certificated
- light weight
