FILTERING SUPPLY

FLOCCULANT CARTRIDGE

Description

- Improves the performance of sand filtration systems
- Eliminates murky water by collecting suspended particles
- Suitable for all sand filter equipment

Instructions:

Add a cartridge (every 10 to 15 days) to the pump prefilter or skimmer basket after a filter wash. Suitable for 6,600 gallon (25m³) pools.

Products

PRODUCT CODE	DESCRIPTION	CONTENTS	PACKING	WEIGHT kg	VOLUME m ³

555008250	Flocculant cartridge	25 kg / 200 cart	1	25	0.021

LIQUID FLOCCULANT

Description

- Eliminates cloudy water by causing small particles to clump together and sink to the bottom of the pool for vacuuming
- Ready to use and much easier than the powder form
- Effective for pool water with pH 6.9 to 7.8 levels
- Suitable for all sand filtration equipment

Instructions:

User advice for private/residential pools

For cloudy pools or after a chlorine shock, treat the pool with 7 fl.oz. per 2,600 gallon (0.2Ltr/10m³) of water. Switch off the filter, dilute the liquid flocculant in a watering can and spread around the pool. The solution will create a grey flocculent which will cause all suspended particles to sink to the bottom of the pool. After 1/2 a day, remove the dirt and debris using a vacuum cleaner and direct it to the nearest drain. Do not allow the water to go through the filtration system. Once complete, adjust the water level to the desired level.

User advice for commercial pools

Liquid flocculant must be injected by a metering/dosing pump, upstream of a sand filter and over a 24 hour period. Use non-diluted liquid flocculant from the can or dilute to a maximum of 25%.

For indoor pools, use 3 to 13 fl.oz. per 260,000 gallons (0.1 to 0.4Ltr/1,000m³) of pool water and allow to circulate throughout the day.

For outdoor pools, use 6 to 26 fl.oz. per 260,000 gallons (0.2 to 0.8Ltr/1,000m³) of pool water and allow to circulate throughout the day.

Products

PRODUCT CODE	DESCRIPTION	CONTENTS	PACKING	WEIGHT kg	VOLUME m ³
