ANTI-ALGAE

QT 20 ANTI-ALGAE

✓ Description

- Destroys and prevents algae from rapidly reproducing
- Highly efficient and can be used in all pH values of treated water
- Compatible with all types of filtration

Instructions:

Instructions: Use 17 fl.oz. per 7,900 gallons (1/2Ltr /20m³) of water.

JET 35 TRIPLE ACTION

✓ Description

- Three preventative treatments + healing in one
- Fights against algae, scale and rust stains
- Prevents lime and metal deposits
- Non-foaming, purifying and curative agent
- Can be used with any disinfection pool treatment

Instructions:

Preventative treatment before filling the pool – Before filling the pool, sprinkle all walls with JET 35, diluted at a rate of 1/10. You can also treat skimmers, overflow drains, main drains, outlets and in between tiles. It is highly recommended to leave the pool for one hour before filling the pool.

Maintenance treatment during the swimming season – Use 17 fl.oz. per 9,000 gallons (1/2Ltr / 35m³) of water, every 15 days as a preventative measure.

ANTI-ALGAE

ANTI-PHOSPHATE PRO

✓ Description

- Removes phosphate, thus depriving the algae of their food
- Compatible with any type of disinfection and filtration equipment
- Associates, as diluted with complimentary treatments used in pools
- Active even in unbalanced pH values. It doesn't alter the pH of the water

Instructions:

Pour ANTI-PHOSPHATE PRO directly into the pool at a rate of ¼ gallon per 15,000 gallons (50m³) of water, destroying 1.5 ppm of phosphate (1Ltr destroys 1.5 ppm). As a precaution, use 3 fl.oz. per 15,000 gallons (0.1Ltr / 50m³) of water to maintain a phosphate level of less than 0.5 ppm.

What are phosphates?

Phosphates are organic material that naturally occurs in water, which feeds algae and allows it to grow. ANTI-PHOSPHATE PRO eliminates that food and in turn eliminates algae.
