

POOL LINING 11/01

ELBTAL POOL LINING

ELBTAL SBG 150

Flexible waterproofing membrane manufactured in plasticised polyvinyl chloride (PVP-P) and reinforced with fibres perfectly suited for pool lining.

✓ Technical features

Context of use:

- For public and private pools with PVC membrane lining
- Skimmer and overflow edge technology with PVC membrane lining

Features:

- Made in fully recyclable reinforced PVC
- Resistant to UV, cold temperatures and adverse weather conditions
- Good weldability and free from heavy metals
- Excellent physiological testing in compliance with EN 71/3
- Antimicrobial, resistant to all chemical products used for water treatment (according to chemical product instructions)
- Uses chemical and mechanical properties in compliance with international regulation
- Does not release dioxins into the atmosphere and can be recycled through degasification

- Strong and waterproof with a thickness of 1.5mm, guaranteeing an excellent pool seal
- Smooth and pleasant to the touch, durable and requires very little maintenance
- Resistant to pool detergents and water purification products, dependant on their individual instructions and a water temperature up to 28°C. Always read the label

Standards:

- Manufactured in compliance with EN 13967, CE 071349-cpd-036
- Thanks to its textured surface, Non-slip STG 200 pools, ensure safe walking on steps, ladders, children's areas and other areas of the pool where users frequently walk
- Our STG 200 pools offer excellent safety standards on non-slip surfaces, confirmed by the class c certification under DIN51097 and DIN EN 13451 standards
