

PREFABRICATED SWIMMING POOLS 17/06

OVERFLOW REGULA

The overflow edge channel REGULA is a new product by Aqua Pool Division, which can be easily used with 'MODULO 80' panels. The Depth of the overflow channel can be adjusted from 17cm up to 25cm and can be installed with a slight slope towards the drains (125) to obtain a higher flow rate. Manifolds can be installed near the compensation tank to save time and materials. The adjustable overflow channel can be matched with stone grids with overflow over the grid and under the edge, or with a traditional 25cm grid. It must be lined with PVC sheet to guarantee waterproofing.
