

TILES 12/27

PORCELAIN TILES

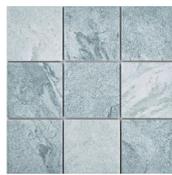

Porcelain tiles are dense, durable ceramic tiles made from fine clay fired at high temperatures. They are highly water-resistant, low-porosity, and suitable for both indoor and outdoor use. Porcelain tiles are available in a variety of finishes, colors, and textures, making them ideal for floors, walls, and wet areas like bathrooms and swimming pools.

Note: There may be a slight deviation in colour between batches. We always recommend to order the entire swimming pool tiles in one go and to ensure the batch number is the same of all tiles before starting installation.
