

COMPETITION EQUIPMENT 13/01 RACING LANES

When performance counts, choose the original AQUA Racing Lanes. Our latest MAXI and MIDI model racing lanes represent the cutting edge of lane design and efficient wave dissipation.

AQUA Racing Lanes comply with all FINA, LEN and relevant regulations. Their unique design creates a multidimensional barrier against waves by dispersing them along the lane line, through each individual disc, and away from the swimmer's path.

✓ Technical features

- Equipped with original SuperTensioner - for safe and secure lane installation and removal.
- The MIDI 110mm is suitable for training and competition, water polo and general pool division.
- The MAXI 150mm is designed for optimal water dissipation and wave control in high turbidity competitive environments (shown above), such as top National and International competition venues.
- All discs are made from UV Stabilised advanced co-polymer thermoplastics.
- Cable is SS316 with diameter of 3.1mm and max force of 5kn - allowing higher tension than other brands and more effective wave dissipation for the worlds fastest pools.
